Ambo University Special Secondary School Kivy App

A mobile-friendly educational application developed using Python and Kivy.

Features

- Home page
- About the school
- Academic programs
- Student activities
- School announcements
- Contact form
- Mobile-friendly interface
- Offline functionality
- 100% Python and Kivy

Files

```
```text
Ambo-University-Special-Secondary-School/
├── main.py
├── requirements.txt
└── README.md
```
```

Installation

```
```bash
pip install -r requirements.txt
```
```

Run

```
```bash
python main.py
```
```

Important

The school history, official motto, contact details, programs and announcements in this starter version should be replaced with verified official school information.

Future Improvements

- Official school logo
- Real school history
- Student registration
- Teacher information
- Exam results
- News and announcements
- School timetable
- Student ID
- SQLite database
- Online database
- School map
- Afaan Oromoo
- Amharic
- English
- Android APK

GitHub Upload

Create a GitHub repository, then create/upload the three files with exactly these names: main.py, requirements.txt, and README.md. Do not put the Python code inside an HTML file.
